YAARALABS · UK BOARD RISK VIEW · COMPONENT GUIDE

UK Board v2: what every screen shows and why

A board view built around risk appetite. Three personas, twelve tabs, one set of data.

THE FLOW

- **Board member:** 5 tabs
- **Risk Committee Chair:** 3 tabs
- **Chief Risk Officer:** 4 tabs
- Every tab opens with a headline: the main problem and the ask.

WHO IT IS FOR

A UK bank board that sets risk appetite and holds owners to it.

HOW TO READ EACH ENTRY

1. What it shows **2.** Why it is there **3.** Data source **4.** How it is worked out **5.** What to do with it

Red boxes mark each component; numbers match the list below the screenshot.

IN THIS GUIDE

- Page 2: where the data comes from.
- Board member, Risk Committee Chair, Chief Risk Officer: every tab, every component.
- States: decision panel, expanded row, measure drawer, tuning lab.
- Glossary, then how to read the board view in two minutes.

DATA

Where the data comes from

Every figure on the board view comes from one store, fed by these 14 systems.

Source	What we take	How often	As at
Risk appetite register	Appetite statements, the 12 measures, amber triggers and limits, risk and control owners, policy-to-control mapping, control tests, issues and actions, attestations, SMF certification, MI distribution lists	Monthly	30 Sep 2026
Treasury and finance MI	LCR, NSFR, wholesale funding, CET1	Monthly	30 Sep 2026
Mortgage origination	Lending vs plan, high-LTV share, loans above 4.5× income, arrears, cost of risk, EPC band at origination	Monthly	30 Sep 2026
Core banking (savings)	Balances, members, account openings by route	Monthly	30 Sep 2026
Transaction monitoring	Alert queue age, alerts cleared in target, handlers, members per handler, screening coverage, restriction breaches by route, SAR timeliness	Daily	28 Oct 2026
Fraud platform logs	Detection time, automated attempts and block rate	Daily	28 Oct 2026
Vulnerability scanner and red-team reports	Critical findings open over 30 days, patch timeliness, red-team and blue-team results	Weekly and per exercise	28 Oct 2026
Complaints and Consumer Duty MI	Complaints and themes, ombudsman uphold rate, call wait, Consumer Duty outcome measures, vulnerable-customer exceptions, redress progress	Monthly	30 Sep 2026
Customer-signals platform	Emerging themes such as account-frozen mentions	Daily	28 Oct 2026
Compliance breach log	Reportable events, routes, clocks, deciders, read-across, open regulator requests	As logged	28 Oct 2026
FCA final notices	Enforcement themes	As published	28 Oct 2026
Board and committee papers	Pack items removed or downgraded, agenda, decision log, board stances	Per meeting	26 Oct 2026
Speak-up log and staff survey	Speak-up cases, days to close, safe to speak up	Quarterly and annual	30 Sep 2026
Agent activity log	Agent findings, drafts, approvals, autonomy levels, backtest results	Continuous log	28 Oct 2026

Projections, owner estimates and backtests are labelled on every entry.

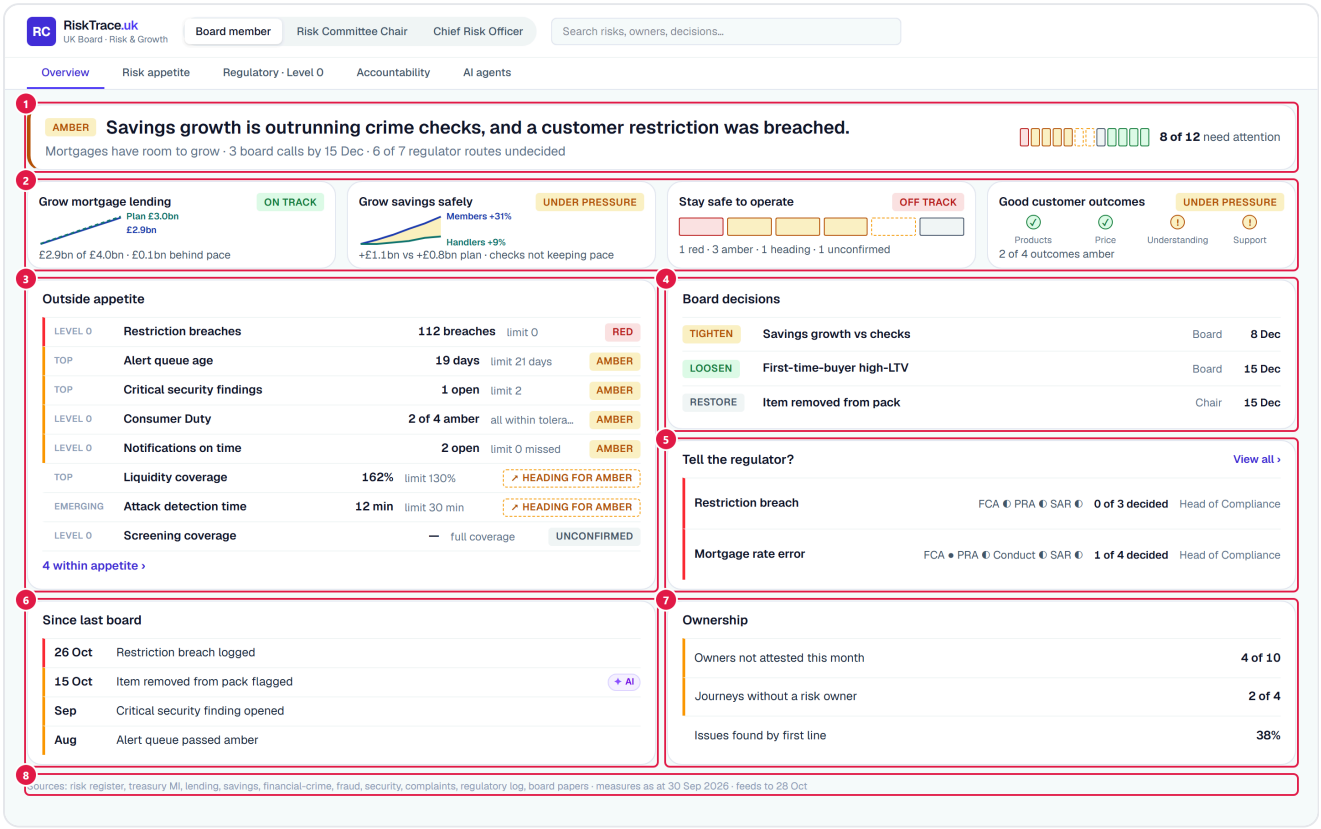

Acronyms in the table: LCR (liquidity coverage ratio), NSFR (net stable funding ratio), CET1 (common equity tier 1), LTV (loan-to-value), EPC (energy performance certificate), SMF (senior manager function), SAR (suspicious activity report), MI (management information), FCA (Financial Conduct Authority).

Board member

A non-executive director: sets risk appetite, challenges owners and takes the board decisions.

1 Overview

One screen: objectives, what is outside appetite, decisions and regulator calls.

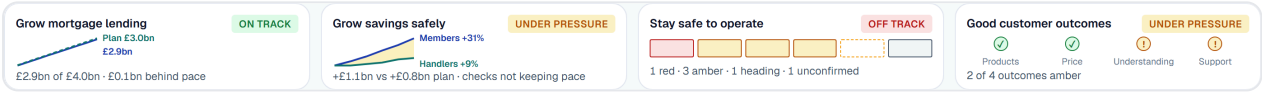

1 Headline bar

What it shows	Tab's worst status, main problem, the ask, 12 status cells, '8 of 12 need attention'.
Why it is there	What is the one thing this tab needs from me?
Data source	Risk appetite register · monthly · 30 Sep 2026; Compliance breach log · as logged · 28 Oct 2026; Board and committee papers · per meeting · 26 Oct 2026; Agent activity log · continuous log · 28 Oct 2026
How it is worked out	Each line uses store figures, e.g. routes undecided; cells count measures by status.
What to do with it	Act on the ask, e.g. 3 board calls by 15 Dec.
On this tab	"Savings growth is outrunning crime checks, and a customer restriction was breached." · Ask: Mortgages have room to grow · 3 board calls by 15 Dec · 6 of 7 regulator routes undecided

2 Strategy objectives

What it shows	Four objectives, each with status pill, mini visual and one value line.
Why it is there	Is strategy on track, and where is it under pressure?
Data source	Risk appetite register · monthly · 30 Sep 2026; Mortgage origination · monthly · 30 Sep 2026; Core banking (savings) · monthly · 30 Sep 2026
How it is worked out	Worst linked measure: red is Off track; amber or unconfirmed, Under pressure.
What to do with it	Click an objective to filter the page to its measures.
Grow mortgage lending	£2.9bn lent against plan pace £3.0bn; £0.1bn behind pace. On track. Entered from Mortgage origination; plan pace is £4.0bn × month ÷ 12.
Grow savings safely	Members +31% against handlers +9% since Q2 2025; +£1.1bn vs +£0.8bn plan. Members and handlers indexed to Q2 2025; entered from Core banking and Transaction monitoring.
Stay safe to operate	Six status cells: 1 red, 3 amber, 1 heading, 1 unconfirmed. Off track. Count of the six measures linked to this objective, by status.
Good customer outcomes	Four Consumer Duty outcome dots; Understanding and Support amber; 2 of 4 amber. Entered from Complaints and Consumer Duty MI (management information); amber outcomes counted.

3 Outside appetite

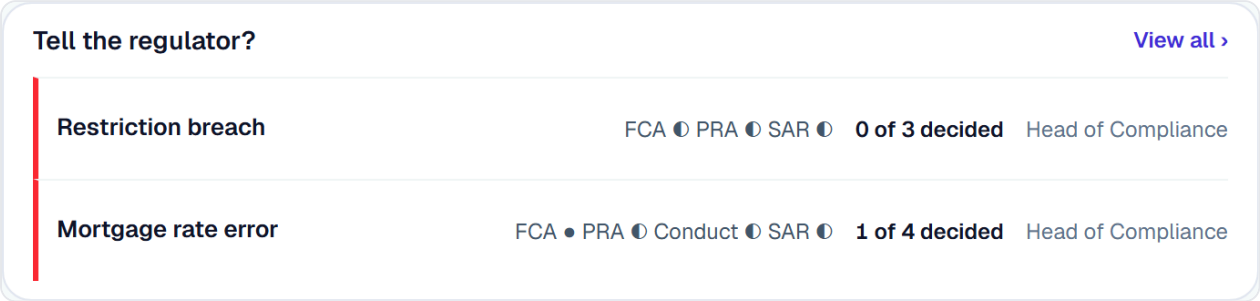

What it shows	Eight measures not within appetite, worst first, with value, limit and status.
Why it is there	Which measures are outside appetite, and how far?
Data source	Risk appetite register · monthly · 30 Sep 2026
How it is worked out	Measures not within, sorted red, amber, heading for amber, unconfirmed.
What to do with it	Open restriction breaches first: 112 against appetite 0.
Label	Projection (6-month trend)

4 Board decisions

What it shows	Tighten savings growth 8 Dec; loosen first-time-buyer limit 15 Dec; restore pack item 15 Dec.
Why it is there	Which levers does the board pull, and by when?
Data source	Board and committee papers · per meeting · 26 Oct 2026
How it is worked out	Entered from Board and committee papers: verb, decider and due date.
What to do with it	Open each call; decide by 8 Dec and 15 Dec.

5 Tell the regulator?

What it shows	Restriction breach 0 of 3 routes decided; mortgage rate error 1 of 4.
Why it is there	Do we need to tell the regulator, and who decides?
Data source	Compliance breach log · as logged · 28 Oct 2026
How it is worked out	Decided routes per event; entered from Compliance breach log.
What to do with it	Head of Compliance decides the restriction breach routes; clocks are immediate.

6 Since last board

What it shows	Four dated changes: restriction breach, item removed, security finding, alert queue past amber.
Why it is there	What has changed since the board last met?
Data source	Board and committee papers · per meeting · 26 Oct 2026; Compliance breach log · as logged · 28 Oct 2026
How it is worked out	Entered from Board and committee papers and Compliance breach log; fixed list.
What to do with it	Open each line; restriction breach logged 26 Oct.

7 Ownership

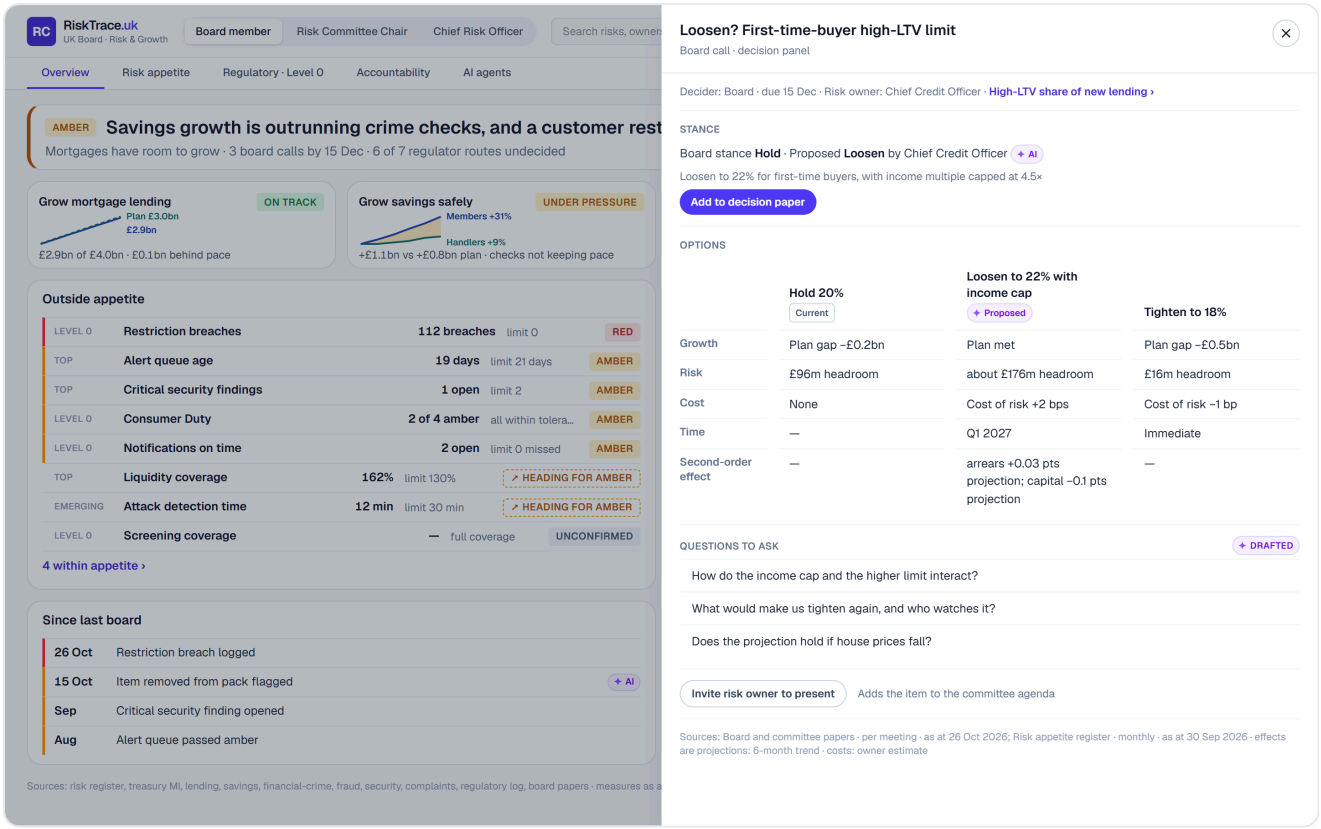

What it shows	Owners not attested 4 of 10; ownerless journeys 2 of 4; first line finds 38%.
Why it is there	Is someone accountable for each risk?
Data source	Risk appetite register · monthly · 30 Sep 2026; Board and committee papers · per meeting · 26 Oct 2026
How it is worked out	Owners with due or unconfirmed attestation; journeys lacking owner; first-line issues ÷ 42.
What to do with it	Press for named owners on savings opening and payments journeys.

8 Sources line

What it shows	Ten named feeds; measures as at 30 Sep 2026; feeds to 28 Oct.
Why it is there	Where do these figures come from, and how fresh are they?
Data source	All 14 feeds in the source table on page 2
How it is worked out	Fixed text on every page; the full source list is on page 2.
What to do with it	Check data currency before relying on a figure.

2 State: Decision panel

Opens from Board decisions: the high-LTV (loan-to-value) limit call.

1 Decision panel

What it shows	Decider, due date, stance, options by growth, risk, cost, time and effect; drafted questions.
Why it is there	Which lever do we pull?
Data source	Board and committee papers · per meeting · 26 Oct 2026; Risk appetite register · monthly · 30 Sep 2026
How it is worked out	Entered from Board and committee papers; headroom (limit − 17.6%) × £4.0bn.
What to do with it	Choose restore or pace by 8 Dec; decide the loan-to-value limit by 15 Dec.
Label	Projection (6-month trend)

3 Risk appetite

All 12 board measures against appetite, with the evidence behind the pressure points.

1 Headline bar

Described at Same as Board member · Overview · 1

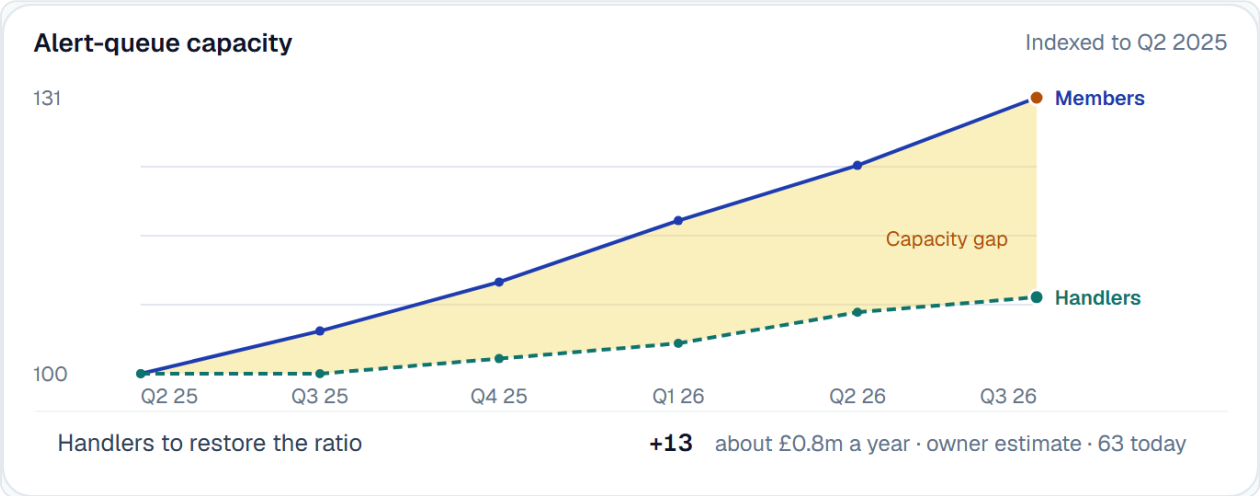

On this tab "8 of 12 measures need attention; credit has room to loosen." · Ask: Tighten savings checks? · Loosen high-LTV? · 14 metrics below off track

2 Board measures

What it shows	Measures outside appetite by tier: position bar, amber, limit, type, stance, below, status.
Why it is there	Are we within appetite, and how close to limits?
Data source	Risk appetite register · monthly · 30 Sep 2026
How it is worked out	Rows not within appetite; '+4 more within appetite' shows the rest.
What to do with it	Open a row, then add its stance to the decision paper.
Label	Projection (6-month trend)

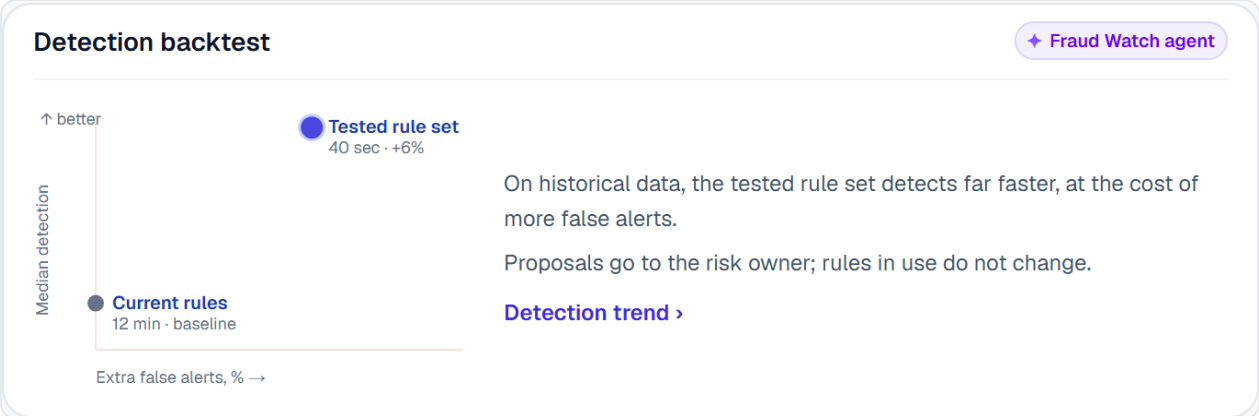

3 Alert-queue capacity

What it shows	Members against qualified handlers indexed to Q2 2025; +13 handlers to restore ratio.
Why it is there	Can crime checks keep pace with membership growth?
Data source	Transaction monitoring · daily · 28 Oct 2026; Core banking (savings) · monthly · 30 Sep 2026
How it is worked out	Handlers needed: 1.90m members ÷ 25,000, minus 63 today, equals 13.
What to do with it	Restore capacity, about £0.8m a year, or pace growth, by 8 Dec.
Label	Owner estimate

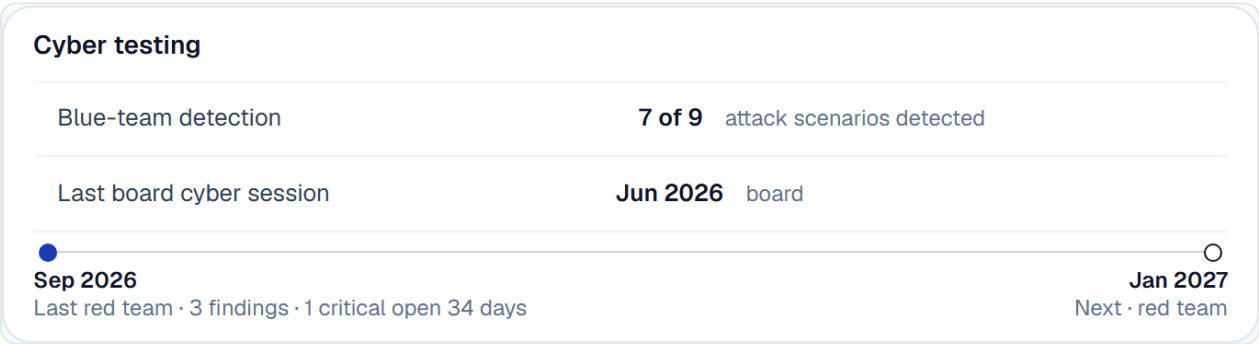

4 Detection backtest

What it shows	Tested rules detect in 40 sec against 12 min today, with +6% false alerts.
Why it is there	Should we change the fraud detection rules?
Data source	Agent activity log · continuous log · 28 Oct 2026; Fraud platform logs · daily · 28 Oct 2026
How it is worked out	Entered from Agent activity log and Fraud platform logs; backtest on historical data.
What to do with it	Risk owner decides on the tested rule set; amber trigger is 15 min.
Label	Backtest on historical data

5 Cyber testing

What it shows	Blue-team detection 7 of 9; last board cyber session Jun 2026; exercise timeline.
Why it is there	Are we tested against attack, and is the board briefed?
Data source	Vulnerability scanner and red-team reports · weekly and per exercise · 28 Oct 2026
How it is worked out	Entered from Vulnerability scanner and red-team reports.
What to do with it	Close the critical finding open 34 days before the Jan 2027 red team.

6 Not yet measured

What it shows	2 risks without a board measure: agent-initiated payments, synthetic-voice impersonation.
Why it is there	Which emerging risks have no measure yet?
Data source	Risk appetite register · monthly · 30 Sep 2026
How it is worked out	Entered from Risk appetite register.
What to do with it	Propose a measure to the named owner; nothing is sent.

7 Tensions

What it shows	Four pairs of aims pulling apart; 2 not agreed, 1 agreed, 1 regulatory floor.
Why it is there	Where do growth and safety pull against each other?
Data source	Risk appetite register · monthly · 30 Sep 2026; Board and committee papers · per meeting · 26 Oct 2026
How it is worked out	Entered from Risk appetite register and Board papers; count of not agreed.
What to do with it	Settle the 8 Dec savings campaign against an alert queue at amber.

8 Policy linkage

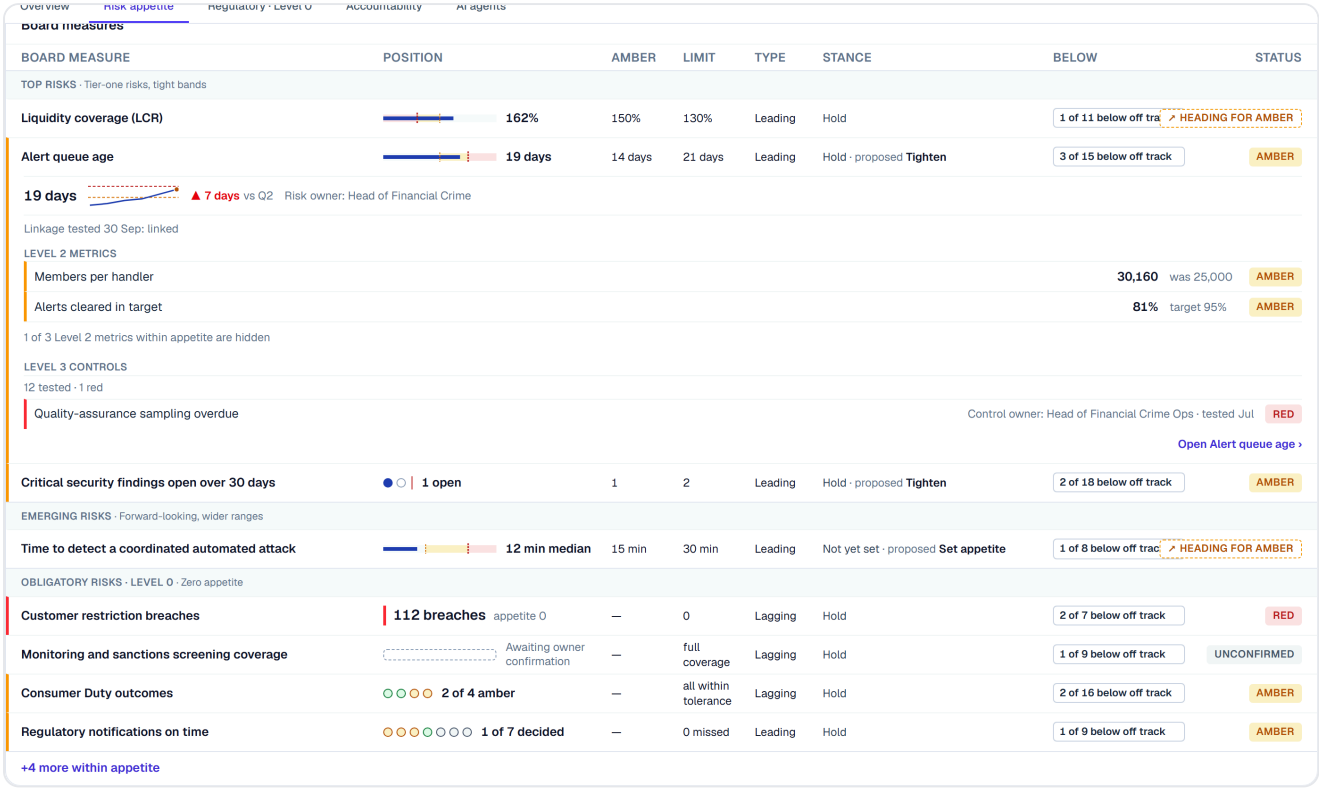

What it shows	41 of 46 policies linked to a board measure; five untracked policies listed.
Why it is there	Do our policies connect to what the board measures?
Data source	Risk appetite register · monthly · 30 Sep 2026
How it is worked out	46 policies minus 5 untracked; entered from Risk appetite register.
What to do with it	Link the five untracked policies, including agent-initiated payments.

9 Sources line

Described at	Same as Board member · Overview · 8

4 State: Expanded measure row

Click a row in Board measures: Alert queue age opens inline.

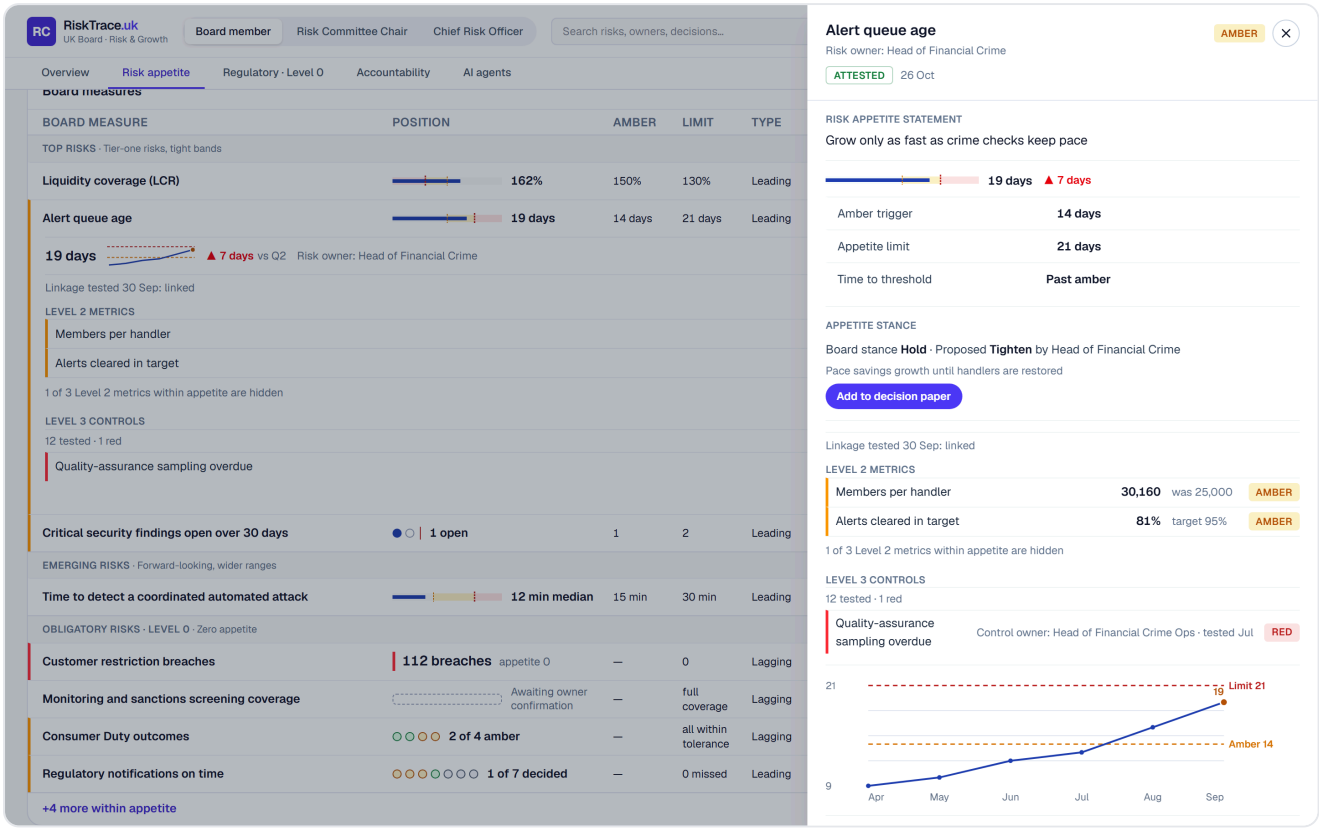

1 Expanded measure row

What it shows	Value, sparkline or 'History from Q3 2026', change vs Q2, owner, Level 2 and 3.
Why it is there	Why is this measure where it is?
Data source	Risk appetite register · monthly · 30 Sep 2026; Transaction monitoring · daily · 28 Oct 2026
How it is worked out	Shows Level 2 rows not within; Level 3 as 'n tested · n red'.
What to do with it	Open the full drawer, e.g. alert queue 19 days against 21 limit.

5 State: Measure drawer

Open Alert queue age from its row: the full measure record.

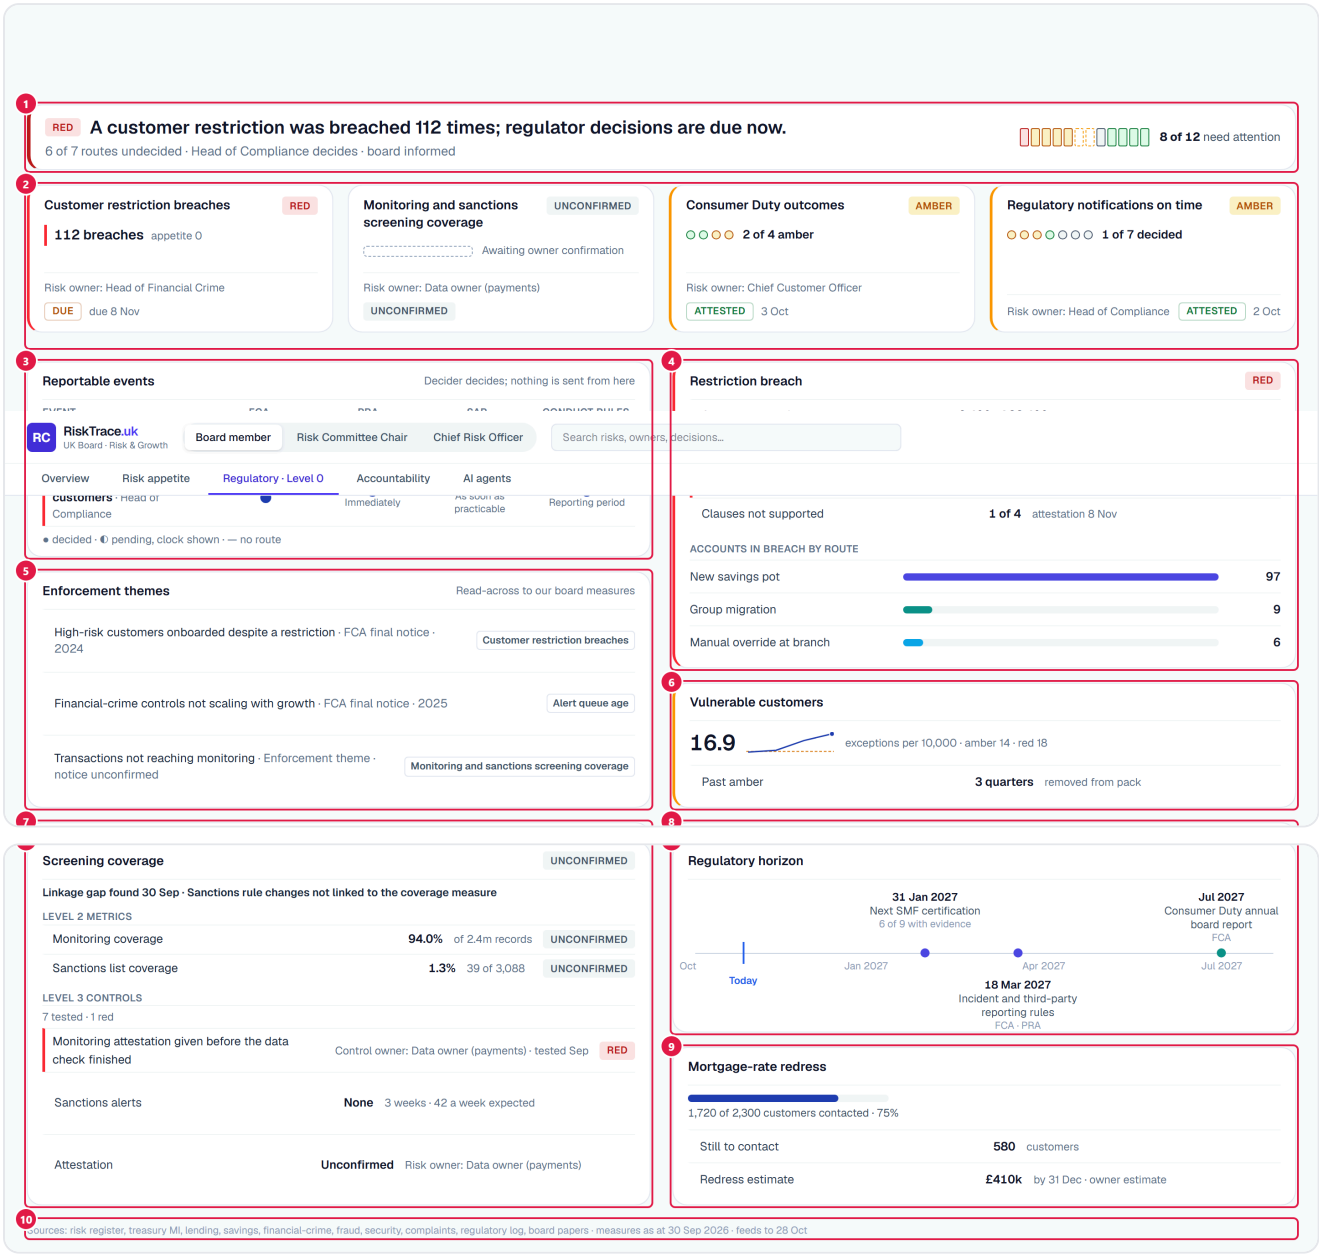

1 Measure drawer

What it shows	Statement, visual, amber trigger, appetite limit, time to threshold, stance, Level 2 and 3, trend.
Why it is there	How close is this measure to its limit, and who owns it?
Data source	Risk appetite register · monthly · 30 Sep 2026; Transaction monitoring · daily · 28 Oct 2026
How it is worked out	Time to threshold: red 'Past limit', amber 'Past amber', else the projection.
What to do with it	Add the stance to the decision paper; CRO (Chief Risk Officer) records due attestations.
Label	Projection (6-month trend)

6 Regulatory · Level 0

Zero-appetite regulatory must-haves: breaches, reporting routes and customer outcomes.

1 Headline bar

Described at Same as Board member · Overview · 1

On this tab "A customer restriction was breached 112 times; regulator decisions are due now." · Ask: 6 of 7 routes undecided · Head of Compliance decides · board informed

2 Zero-appetite measure cards

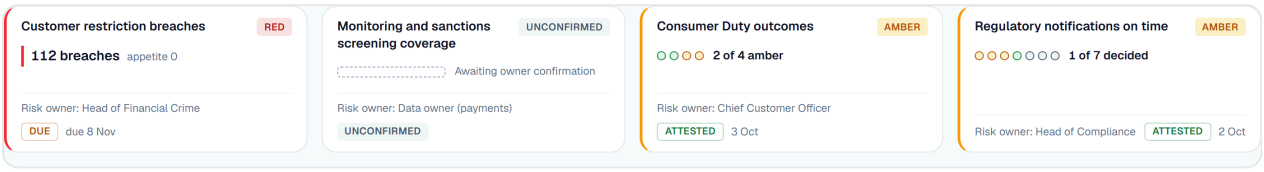

What it shows Four zero-appetite measures, each with status, visual, risk owner and attestation.

Why it is there Are we within zero appetite on our regulatory must-haves?

Data source Transaction monitoring · daily · 28 Oct 2026; Complaints and Consumer Duty MI · monthly · 30 Sep 2026; Compliance breach log · as logged · 28 Oct 2026; Risk appetite register · monthly · 30 Sep 2026

How it is worked out Status entered from Transaction monitoring, Consumer Duty MI (management information), Compliance breach log.

What to do with it Restriction attestation due 8 Nov; screening coverage still awaits owner confirmation.

3 Reportable events

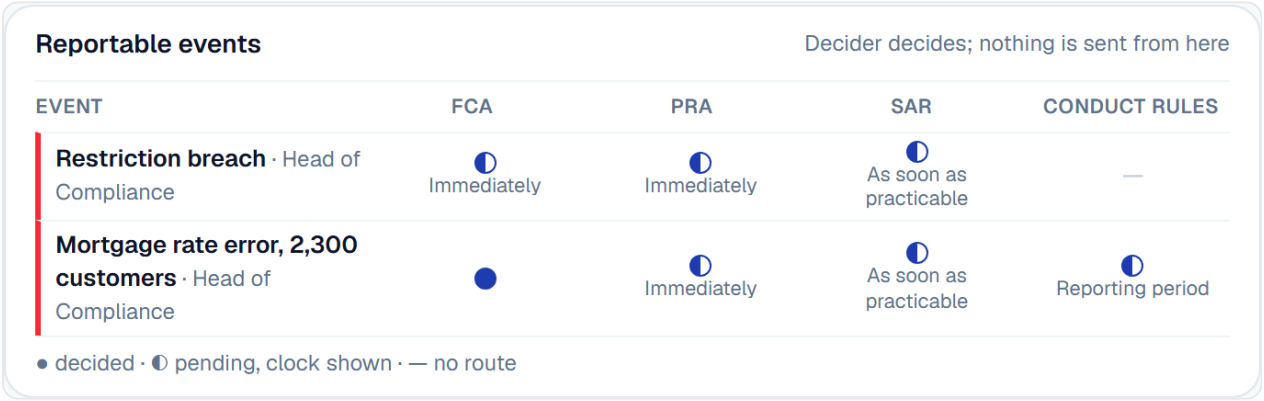

What it shows Two events against FCA, PRA, SAR and Conduct rules routes; decided or pending.

Why it is there Do I need to tell the regulator, and who decides?

Data source Compliance breach log · as logged · 28 Oct 2026

How it is worked out Each cell is decided if its route status is decided, otherwise pending.

What to do with it Head of Compliance decides restriction breach FCA and PRA routes immediately.

4 Restriction breach

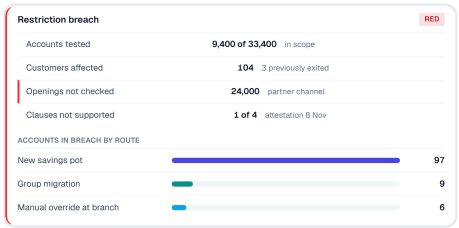

What it shows 9,400 of 33,400 tested; 104 customers affected; 24,000 openings not checked.

Why it is there How big is the restriction breach, and where did it come from?

Data source Transaction monitoring · daily · 28 Oct 2026

How it is worked out Entered from Transaction monitoring; unchecked openings summed; routes sorted by accounts.

What to do with it Attestation due 8 Nov; 1 of 4 clauses not supported by the system.

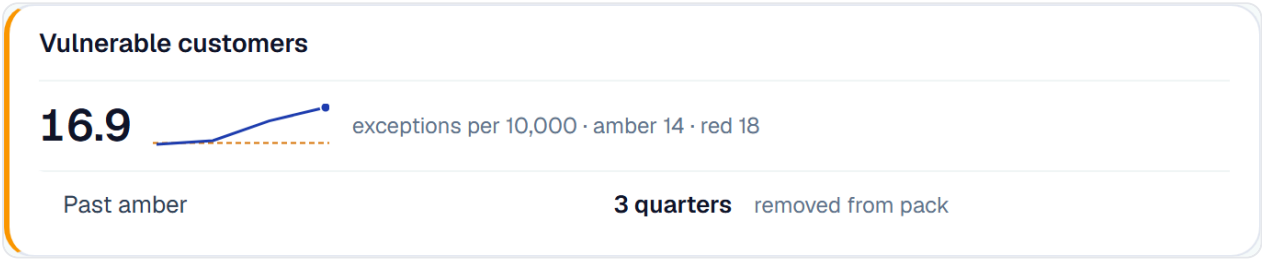

5 Enforcement themes

What it shows	Three FCA (Financial Conduct Authority) enforcement themes, each mapped to one board measure.
Why it is there	Could recent enforcement themes apply to us?
Data source	FCA final notices · as published · 28 Oct 2026
How it is worked out	Entered from FCA (Financial Conduct Authority) final notices; one notice still unconfirmed.
What to do with it	Check read-across for restriction, alert queue and screening measures.

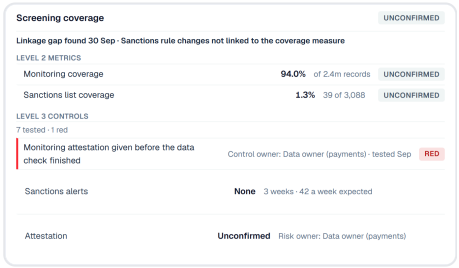

6 Vulnerable customers

What it shows	Exceptions 16.9 per 10,000 contacts, sparkline, amber 14, red 18, past amber 3 quarters.
Why it is there	Are vulnerable customers getting good outcomes?
Data source	Complaints and Consumer Duty MI · monthly · 30 Sep 2026
How it is worked out	Entered from Complaints and Consumer Duty MI (management information); latest quarter shown.
What to do with it	Item amber for 3 quarters was removed from pack; ask for it back.

7 Screening coverage

What it shows	Linkage gap, unconfirmed Level 2 coverage, 1 red control, no sanctions alerts.
Why it is there	Is every transaction and customer actually screened?
Data source	Transaction monitoring · daily · 28 Oct 2026
How it is worked out	Entered from Transaction monitoring; Level 2 rows shown only when not within appetite.
What to do with it	Get owner confirmation; sanctions coverage 39 of 3,088 entries, no alerts 3 weeks.

8 Regulatory horizon

What it shows	SMF (Senior Manager Function) certification 31 Jan 2027; incident rules 18 Mar 2027; more.
Why it is there	Which regulatory dates must we prepare for?
Data source	Compliance breach log · as logged · 28 Oct 2026; Risk appetite register · monthly · 30 Sep 2026
How it is worked out	Dates entered from Compliance breach log; Jul 2027 item: Source not wired.
What to do with it	Get evidence for 3 more Senior Manager Functions before 31 Jan 2027.

9 Mortgage-rate redress

What it shows	1,720 of 2,300 customers contacted, 75%; 580 still to contact; £410k redress.
Why it is there	Are affected mortgage customers being put right on time?
Data source	Complaints and Consumer Duty MI · monthly · 30 Sep 2026
How it is worked out	Contacted divided by customers affected; redress entered from Complaints and Consumer Duty MI.
What to do with it	Contact the remaining 580 customers; redress estimate £410k due by 31 Dec.
Label	Owner estimate

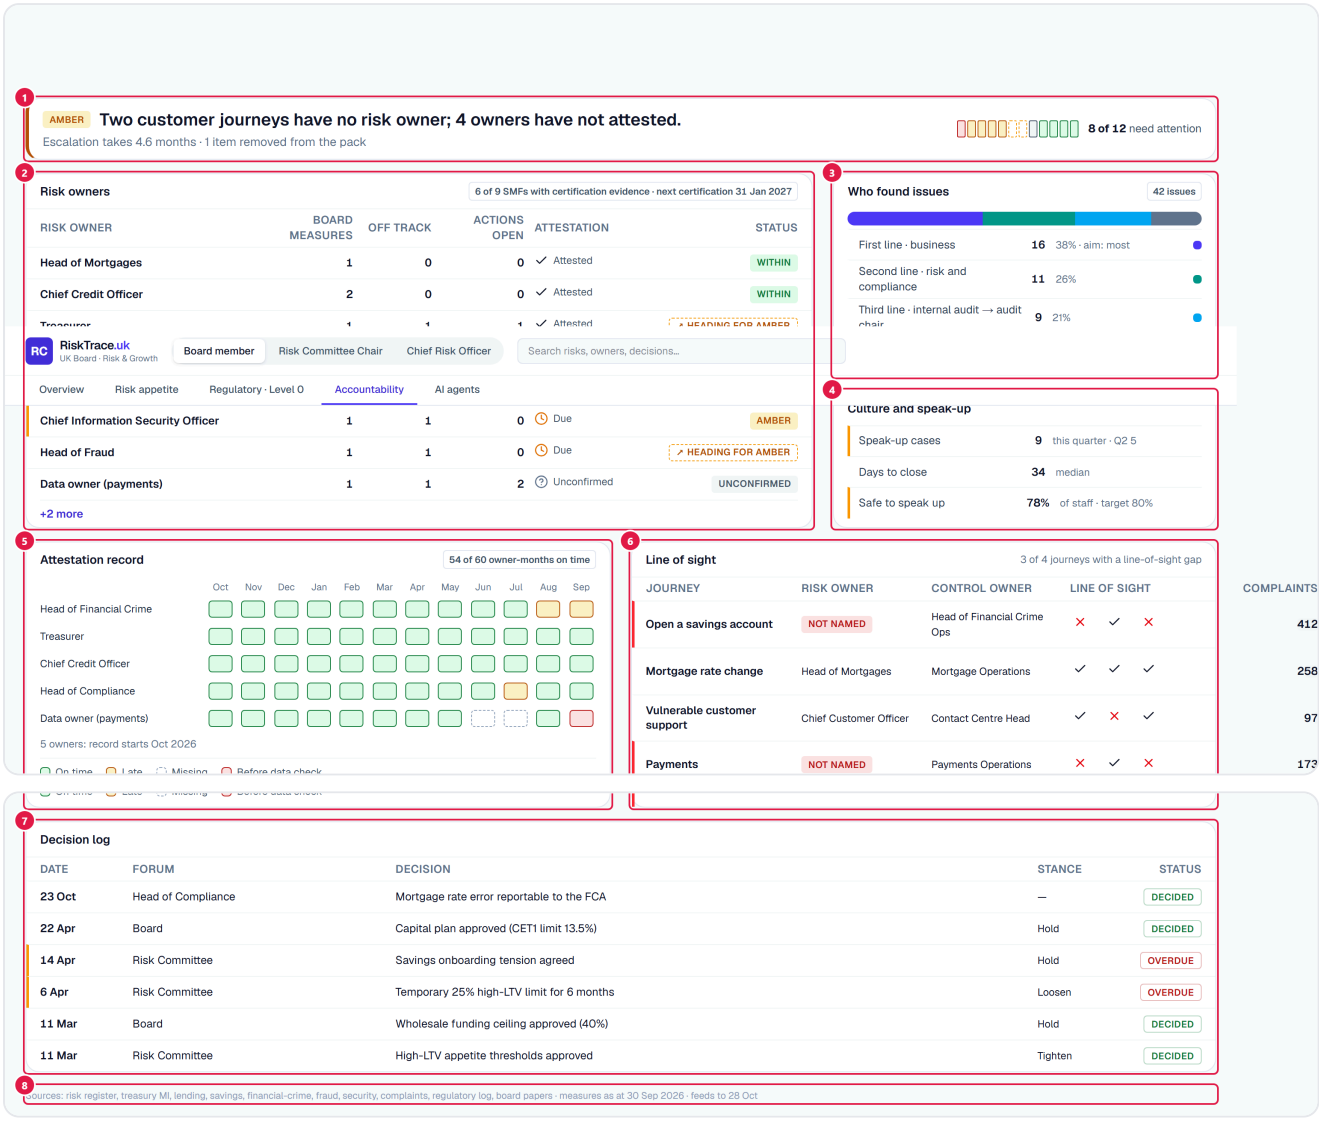

10 Sources line

Described at	Same as Board member · Overview · 8

7 Accountability

Who owns each risk, whether they signed, and how fast bad news travels.

1 Headline bar

Described at Same as Board member · Overview · 1

On this tab "Two customer journeys have no risk owner; 4 owners have not attested." · Ask: Escalation takes 4.6 months · 1 item removed from the pack

2 Risk owners

What it shows Ten risk owners: board measures, off track, actions open, attestation and status.

Why it is there Who owns each risk, and are they keeping up?

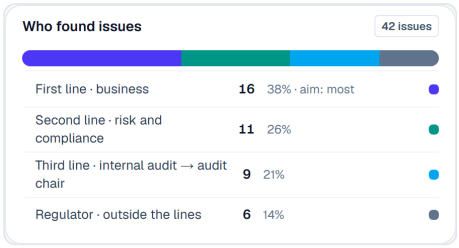

Data source Risk appetite register · monthly · 30 Sep 2026

How it is worked out Off track counts measures not within; status is worst linked measure; actions are open drafts.

What to do with it 6 of 9 SMFs (senior manager functions) have certification evidence; next certification 31 Jan 2027.

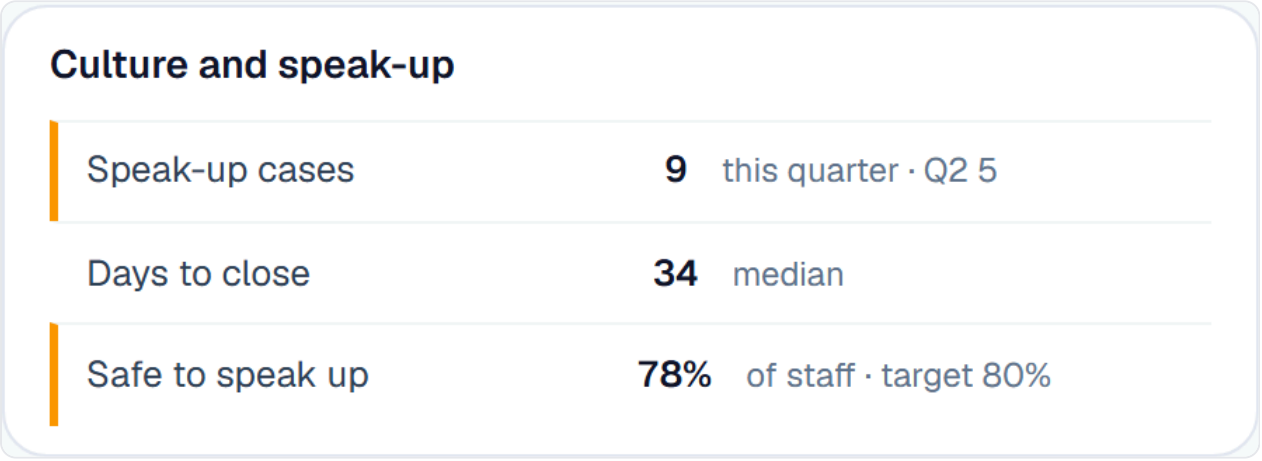

3 Who found issues

What it shows	42 issues split by first line, second line, internal audit and regulator.
Why it is there	Are we finding our own problems before the regulator does?
Data source	Risk appetite register · monthly · 30 Sep 2026
How it is worked out	Each line's count divided by the 42-issue total; entered from Risk appetite register.
What to do with it	First line found 16, 38%; regulator found 6, 14%.

4 Culture and speak-up

What it shows	Speak-up cases 9, days to close 34, safe to speak up 78%.
Why it is there	Do staff feel safe to raise concerns?
Data source	Speak-up log and staff survey · quarterly and annual · 30 Sep 2026
How it is worked out	Entered from Speak-up log and staff survey, aggregates only.
What to do with it	Cases up from 5 in Q2; safe to speak up 78% against 80%.

5 Attestation record

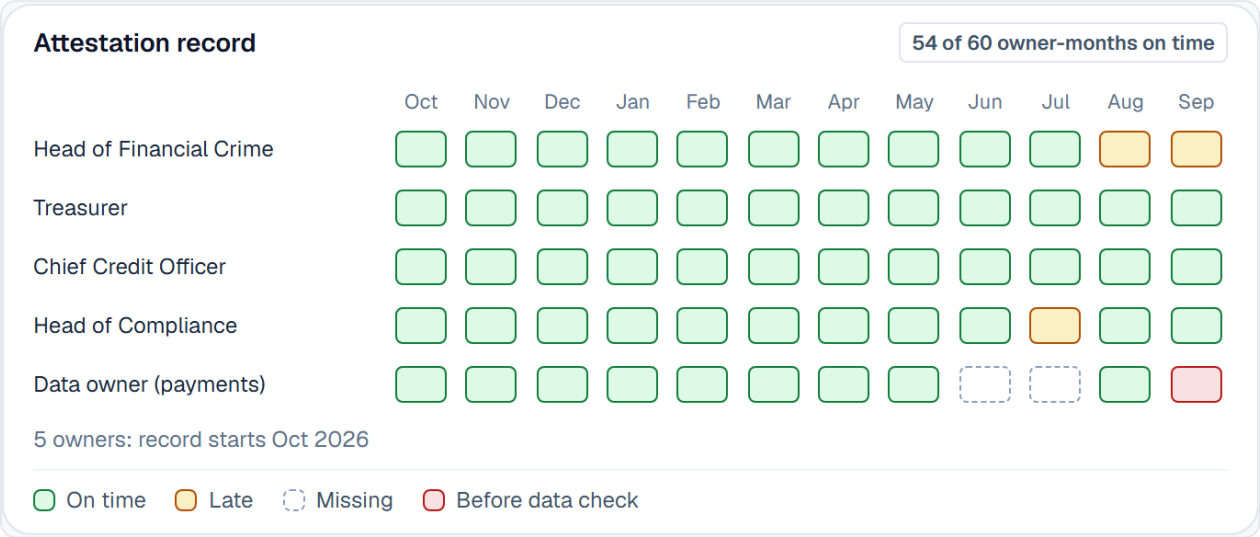

What it shows Twelve months of sign-offs per owner: on time, late, missing, before data check.

Why it is there Do risk owners sign off on time, and after the data check?

Data source Risk appetite register · monthly · 30 Sep 2026

How it is worked out Count of owner-months marked on time across all cells: 54 of 60.

What to do with it Challenge the payments data owner: 2 missing, 1 signed before data check.

6 Line of sight

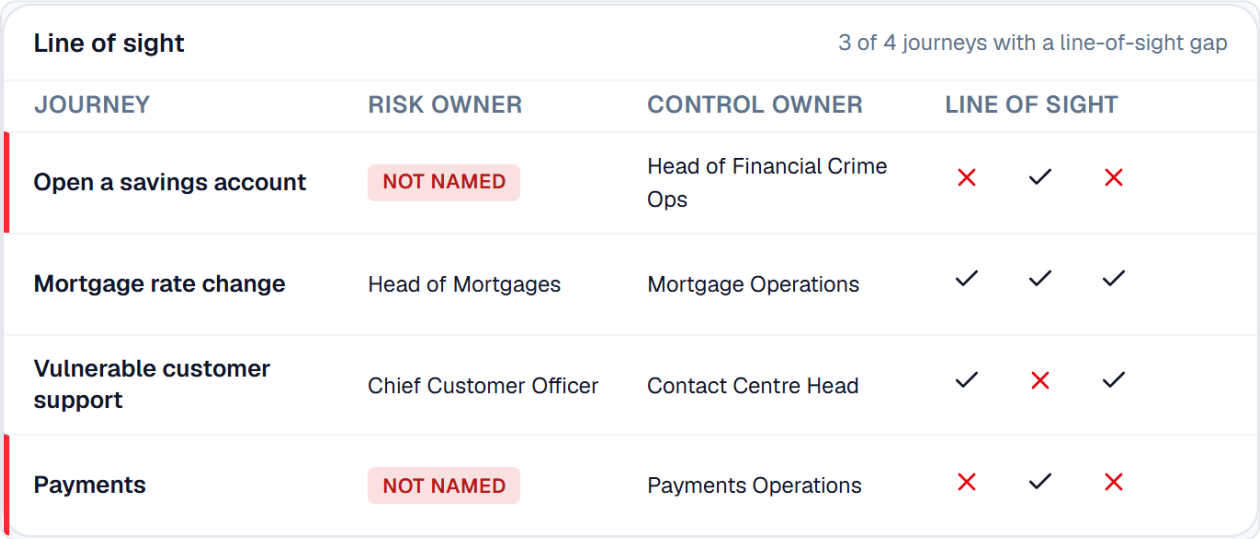

What it shows Four journeys: risk owner, control owner, three checks and complaints.

Why it is there Does a named owner see complaints, errors and parameter changes?

Data source Risk appetite register · monthly · 30 Sep 2026; Complaints and Consumer Duty MI · monthly · 30 Sep 2026

How it is worked out Gap counted where any of three line-of-sight checks fails; complaints bar scaled to maximum.

What to do with it 3 of 4 journeys have a gap; name owners for savings and payments.

7 Decision log

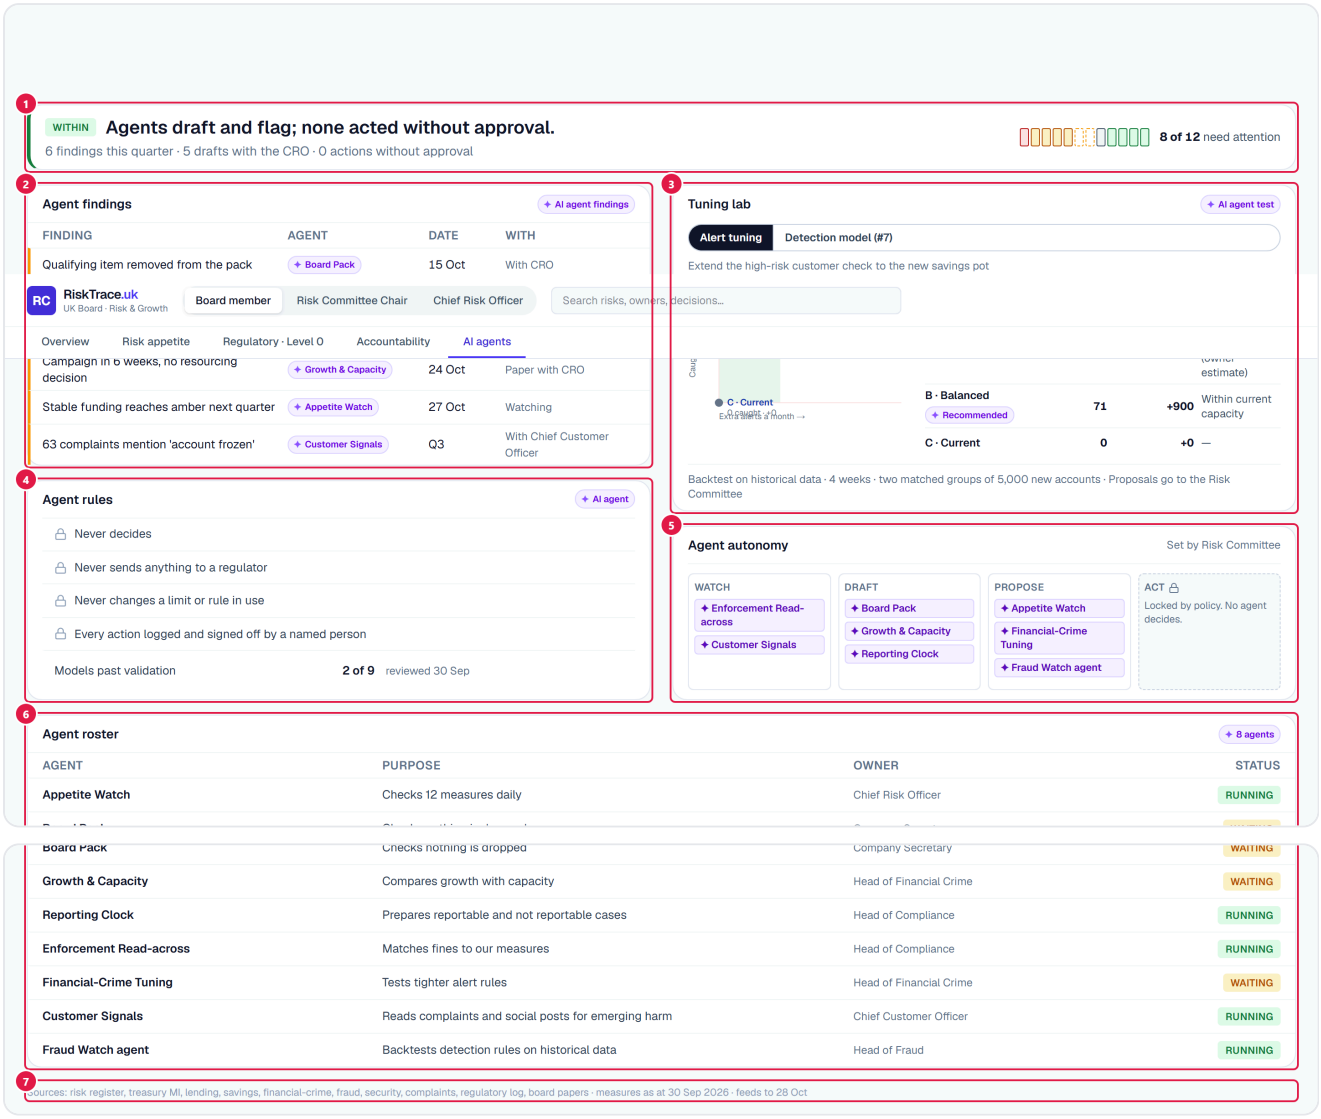

What it shows	Six past decisions with date, forum, decision, stance and status.
Why it is there	What did we decide, and did it hold?
Data source	Board and committee papers · per meeting · 26 Oct 2026
How it is worked out	Entered from Board and committee papers; green outcome shows Decided, otherwise Overdue.
What to do with it	Follow up the overdue savings onboarding tension and expired high-LTV (loan-to-value) limit.

8 Sources line

Described at	Same as Board member · Overview · 8

8 AI agents

What the AI agents found, the limits they work within, and the tuning lab.

1 Headline bar

Described at Same as Board member · Overview · 1

On this tab "Agents draft and flag; none acted without approval." · Ask: 6 findings this quarter · 5 drafts with the CRO · 0 actions without approval

2 Agent findings

What it shows Six agent findings: finding, agent, date flagged and who holds it now.

Why it is there What have the agents found this quarter, and who holds each one?

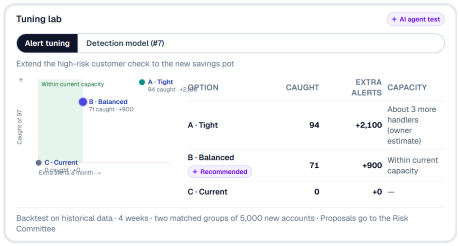

Data source Agent activity log · continuous log · 28 Oct 2026

How it is worked out Entered from Agent activity log; red or amber edge follows each finding's tone.

What to do with it Open a finding, e.g. 97 of 112 breaches via the savings pot.

3 Tuning lab

What it shows	Two backtest scenarios: alert tuning and detection model (#7).
Why it is there	Which lever do we pull to close the savings pot gap?
Data source	Agent activity log · continuous log · 28 Oct 2026
How it is worked out	Entered from Agent activity log; shaded zone is options within current capacity.
What to do with it	Propose option B: 71 of 97 caught, +900 alerts, within current capacity.
Label	Backtest on historical data

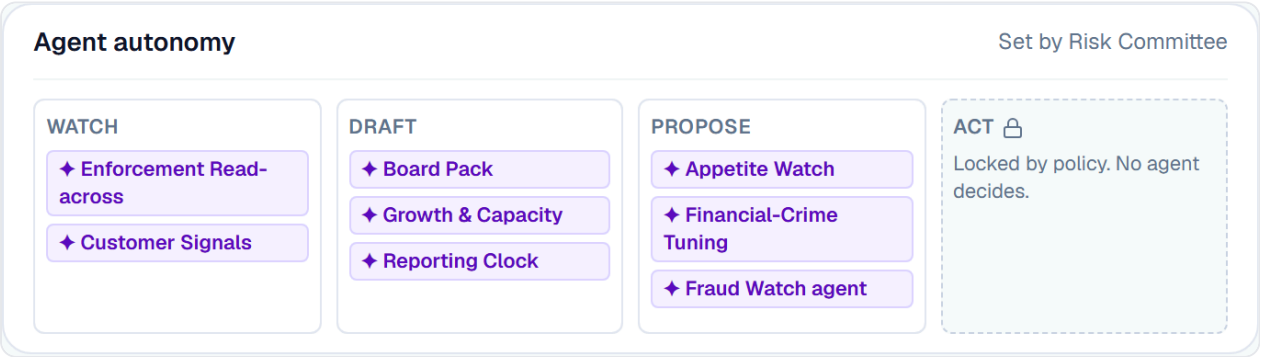

4 Agent rules

What it shows	Four locked rules, plus models past validation: 2 of 9, reviewed 30 Sep.
Why it is there	Are the agents staying inside their limits?
Data source	Agent activity log · continuous log · 28 Oct 2026
How it is worked out	Entered from Agent activity log; model count split from the oversight record.
What to do with it	Ask why only 2 of 9 models are past validation.

5 Agent autonomy

What it shows	Eight agents placed on Watch, Draft, Propose; Act is locked by policy.
Why it is there	How much freedom does each agent have, and is Act closed?
Data source	Agent activity log · continuous log · 28 Oct 2026
How it is worked out	Entered from Agent activity log; session level starts from each agent's seeded level.
What to do with it	Chair drafts a level change for committee, e.g. Customer Signals to Draft.

6 Agent roster

What it shows	8 agents: agent, purpose, owner and status; five running, three waiting.
Why it is there	Which agents run, what does each do, and who owns it?
Data source	Agent activity log · continuous log · 28 Oct 2026
How it is worked out	Entered from Agent activity log; header count is the number of roster agents.
What to do with it	Open an agent to see its finding, owner and drafts.

7 Sources line

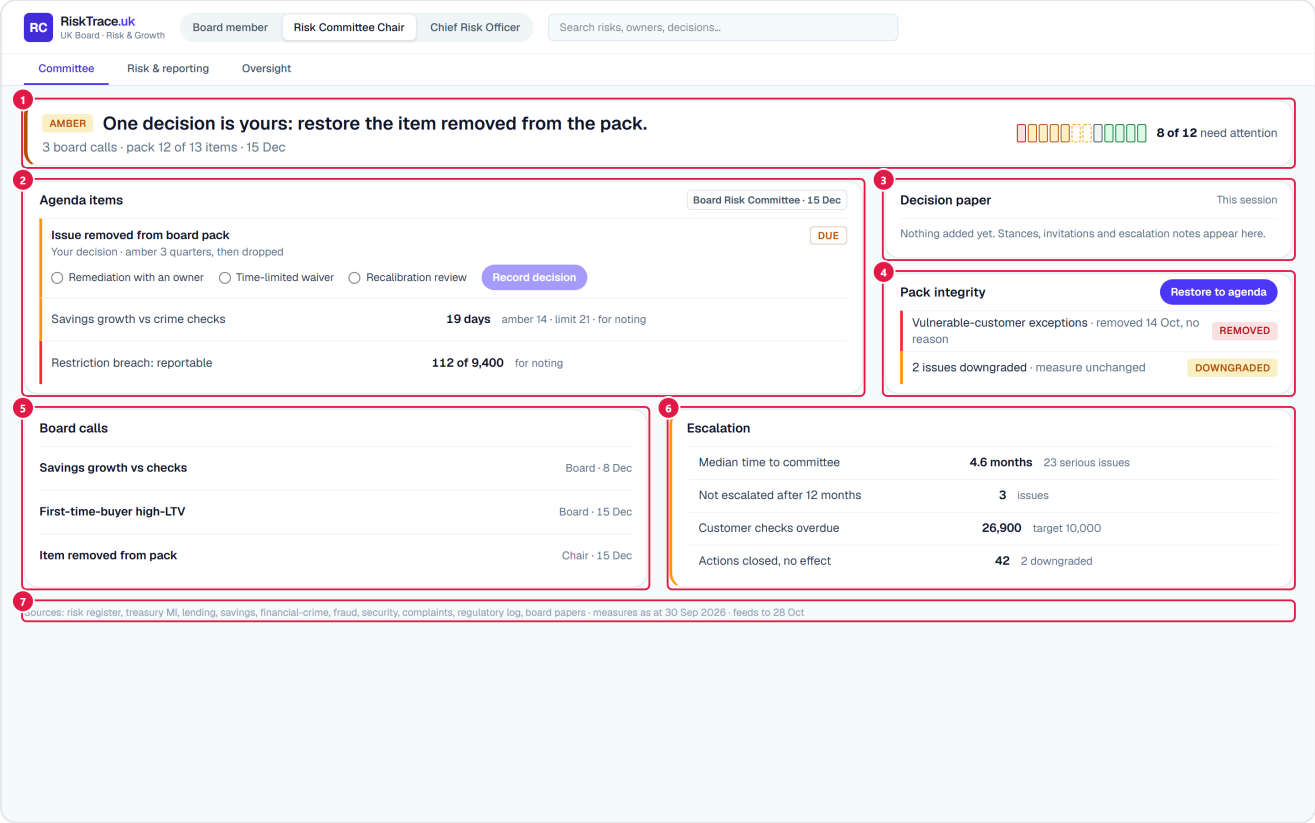

Described at Same as Board member · Overview · 8

Risk Committee Chair

Chairs the Board Risk Committee: runs the agenda, protects the pack, oversees owners and agents.

1 Committee

Preparing the Board Risk Committee: agenda, decision paper, pack and escalation.

1 Headline bar

Described at Same as Board member · Overview · 1

On this tab "One decision is yours: restore the item removed from the pack." · Ask: 3 board calls · pack 12 of 13 items · 15 Dec

2 Agenda items

What it shows Board Risk Committee 15 Dec: removed pack item to decide, two items for noting.

Why it is there What must the committee decide or note on 15 Dec?

Data source Board and committee papers · per meeting · 26 Oct 2026

How it is worked out Values read from alert queue and restriction measures; decision options entered from papers.

What to do with it Record remediation, waiver or recalibration for the dropped item before 15 Dec.

3 Decision paper

What it shows	Stances, invitations, escalation notes and tuning proposals added this session.
Why it is there	What will we take to the decision paper?
Data source	Board and committee papers · per meeting · 26 Oct 2026
How it is worked out	Lists this session's added items; nothing is sent anywhere.
What to do with it	Review items before the 15 Dec Board Risk Committee.

4 Pack integrity

What it shows	Vulnerable-customer exceptions removed 14 Oct with no reason; 2 issues downgraded.
Why it is there	Has anything been dropped from the board pack quietly?
Data source	Board and committee papers · per meeting · 26 Oct 2026
How it is worked out	Shows Restored when the latest pack version includes the vulnerable-customer item.
What to do with it	Ask to restore vulnerable-customer exceptions to the 15 Dec agenda.

5 Board calls

What it shows	Three calls with decider and date: Board 8 Dec, Board 15 Dec, Chair 15 Dec.
Why it is there	Which decisions reach my committee, and when?
Data source	Board and committee papers · per meeting · 26 Oct 2026
How it is worked out	Entered from Board and committee papers.
What to do with it	Restore the removed pack item, the Chair's decision, by 15 Dec.

6 Escalation

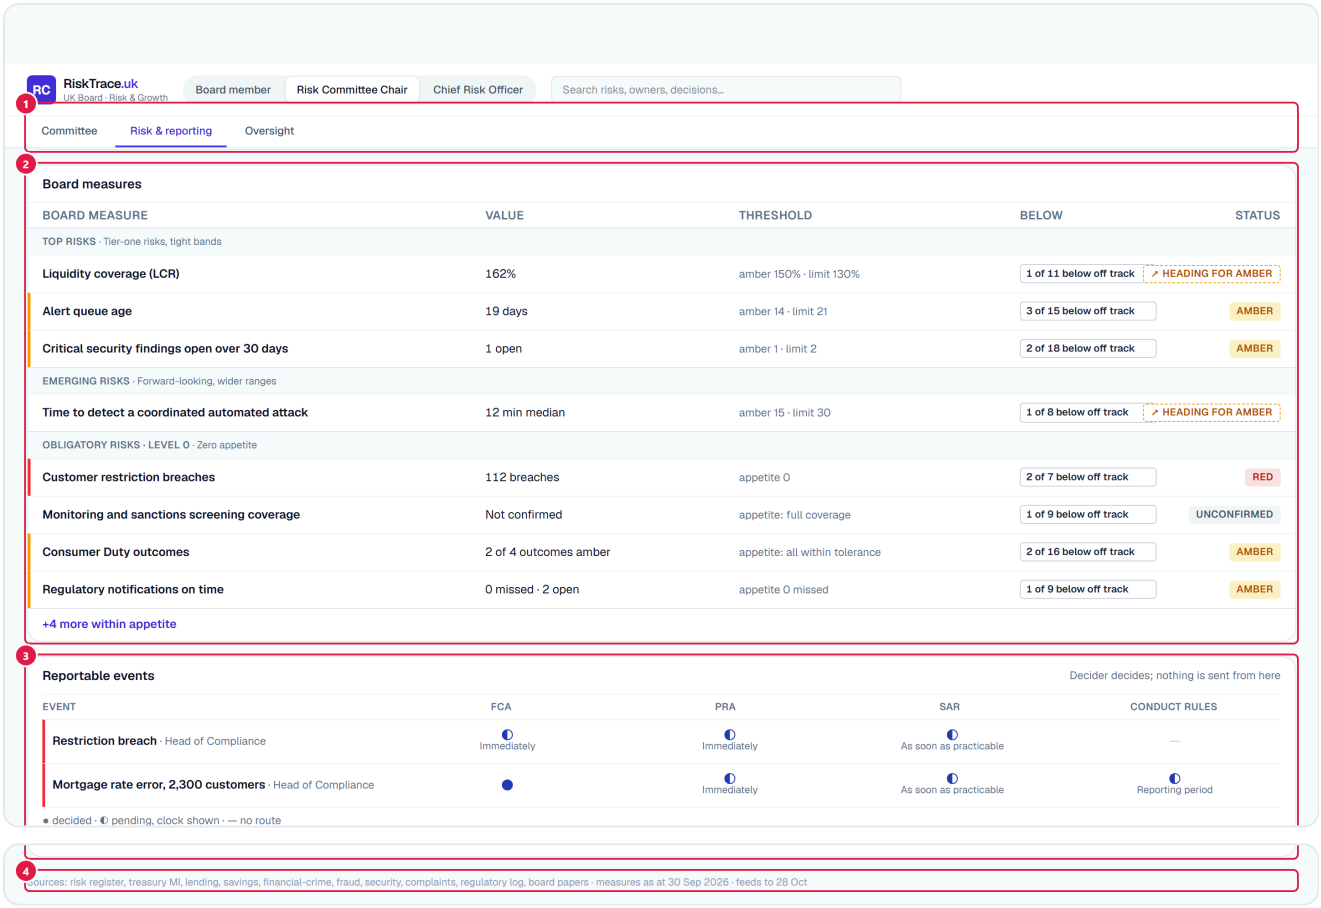

What it shows	Median 4.6 months to committee; 3 not escalated; 26,900 checks overdue.
Why it is there	How long does bad news take to reach us?
Data source	Risk appetite register · monthly · 30 Sep 2026
How it is worked out	Entered from Risk appetite register; median measured from first logged high severity.
What to do with it	Ask why 3 issues sat unescalated over 12 months; 42 actions closed without effect.

7 Sources line

Described at	Same as Board member · Overview · 8

2 Risk & reporting

The 12 measures in plain text, and the events that may need reporting.

1 Headline bar

Described at	Same as Board member · Overview · 1
On this tab	"8 of 12 measures need attention; 6 regulator routes undecided."

2 Board measures

What it shows	Text table by tier: value, threshold, below chip and status; no visuals.
Why it is there	Which measures need my committee's attention?
Data source	Risk appetite register · monthly · 30 Sep 2026
How it is worked out	Rows not within appetite; '+4 more within appetite' shows the rest.
What to do with it	Raise the 8 of 12 not within appetite at committee.
Label	Projection (6-month trend)

3 Reportable events

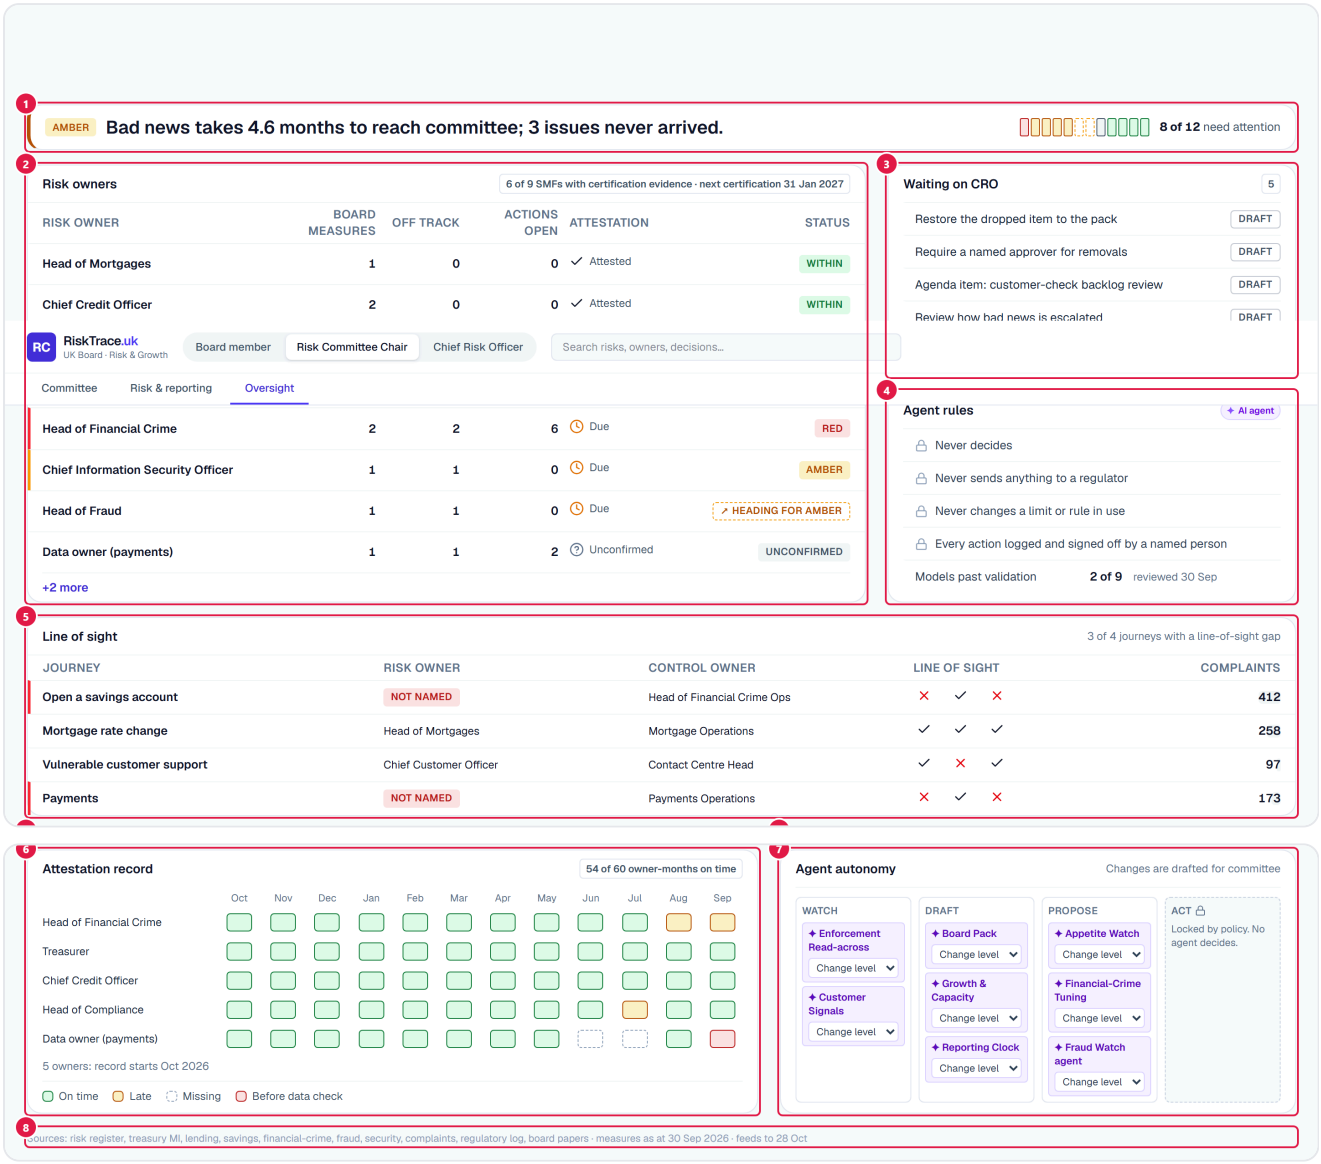

Described at	Same as Board member · Regulatory · Level 0 · 3
On this tab	Same matrix; the Chair sees it without action buttons.

4 Sources line

Described at	Same as Board member · Overview · 8

3 Oversight

Owners, line of sight, attestation and how much the agents may do.

1 Headline bar

Described at Same as Board member · Overview · 1

On this tab "Bad news takes 4.6 months to reach committee; 3 issues never arrived."

2 Risk owners

Described at Same as Board member · Accountability · 2

3 Waiting on CRO

What it shows Agent drafts still waiting for Chief Risk Officer sign-off; five at start.

Why it is there What is stuck with the Chief Risk Officer before committee?

Data source Agent activity log · continuous log · 28 Oct 2026

How it is worked out Count of queued agent drafts still in draft status.

What to do with it Press the Chief Risk Officer on five drafts before 15 Dec.

4 Agent rules

Described at Same as Board member · AI agents · 4

5 Line of sight

Described at Same as Board member · Accountability · 6

6 Attestation record

Described at Same as Board member · Accountability · 5

Chief Risk Officer

Runs the second line: approves regulator cases and agent drafts, keeps the roll-up honest.

1 My actions

The Chief Risk Officer's work queue: cases to send, drafts to approve, deadlines.

1 Headline bar

Described at Same as Board member · Overview · 1

On this tab "3 regulator cases to send now; 5 drafts need your approval."

2 Work queue

What it shows	Tasks by type: send case, prepare, approve, chase; with due date and owner.
Why it is there	What must the Chief Risk Officer do next, in order?
Data source	Risk appetite register · monthly · 30 Sep 2026; Compliance breach log · as logged · 28 Oct 2026; Agent activity log · continuous log · 28 Oct 2026
How it is worked out	Built from open case drafts, fixed papers, queued drafts and owners with actions; ranked.
What to do with it	Send 3 immediate cases now; restriction attestation evidence by 8 Nov.

3 Deadlines

What it shows	Four dates: restriction attestation, savings campaign, Board Risk Committee, incident-reporting rules.
Why it is there	What dates are coming that we cannot miss?
Data source	Board and committee papers · per meeting · 26 Oct 2026; Compliance breach log · as logged · 28 Oct 2026
How it is worked out	Dates entered from Board and committee papers and Compliance breach log.
What to do with it	8 Nov attestation, 8 Dec campaign, 15 Dec committee, 18 Mar 2027 rules.

4 Reporting clocks due

What it shows	Three immediate reporting clocks: restriction FCA, restriction PRA, rate error PRA.
Why it is there	Which regulator notifications are due immediately?
Data source	Compliance breach log · as logged · 28 Oct 2026
How it is worked out	Count of routes not decided with a 24-hour clock.
What to do with it	Get FCA (Financial Conduct Authority) and PRA (Prudential Regulation Authority) routes decided now.

5 Decision paper

Described at	Same as Risk Committee Chair · Committee · 3

6 Pack checklist

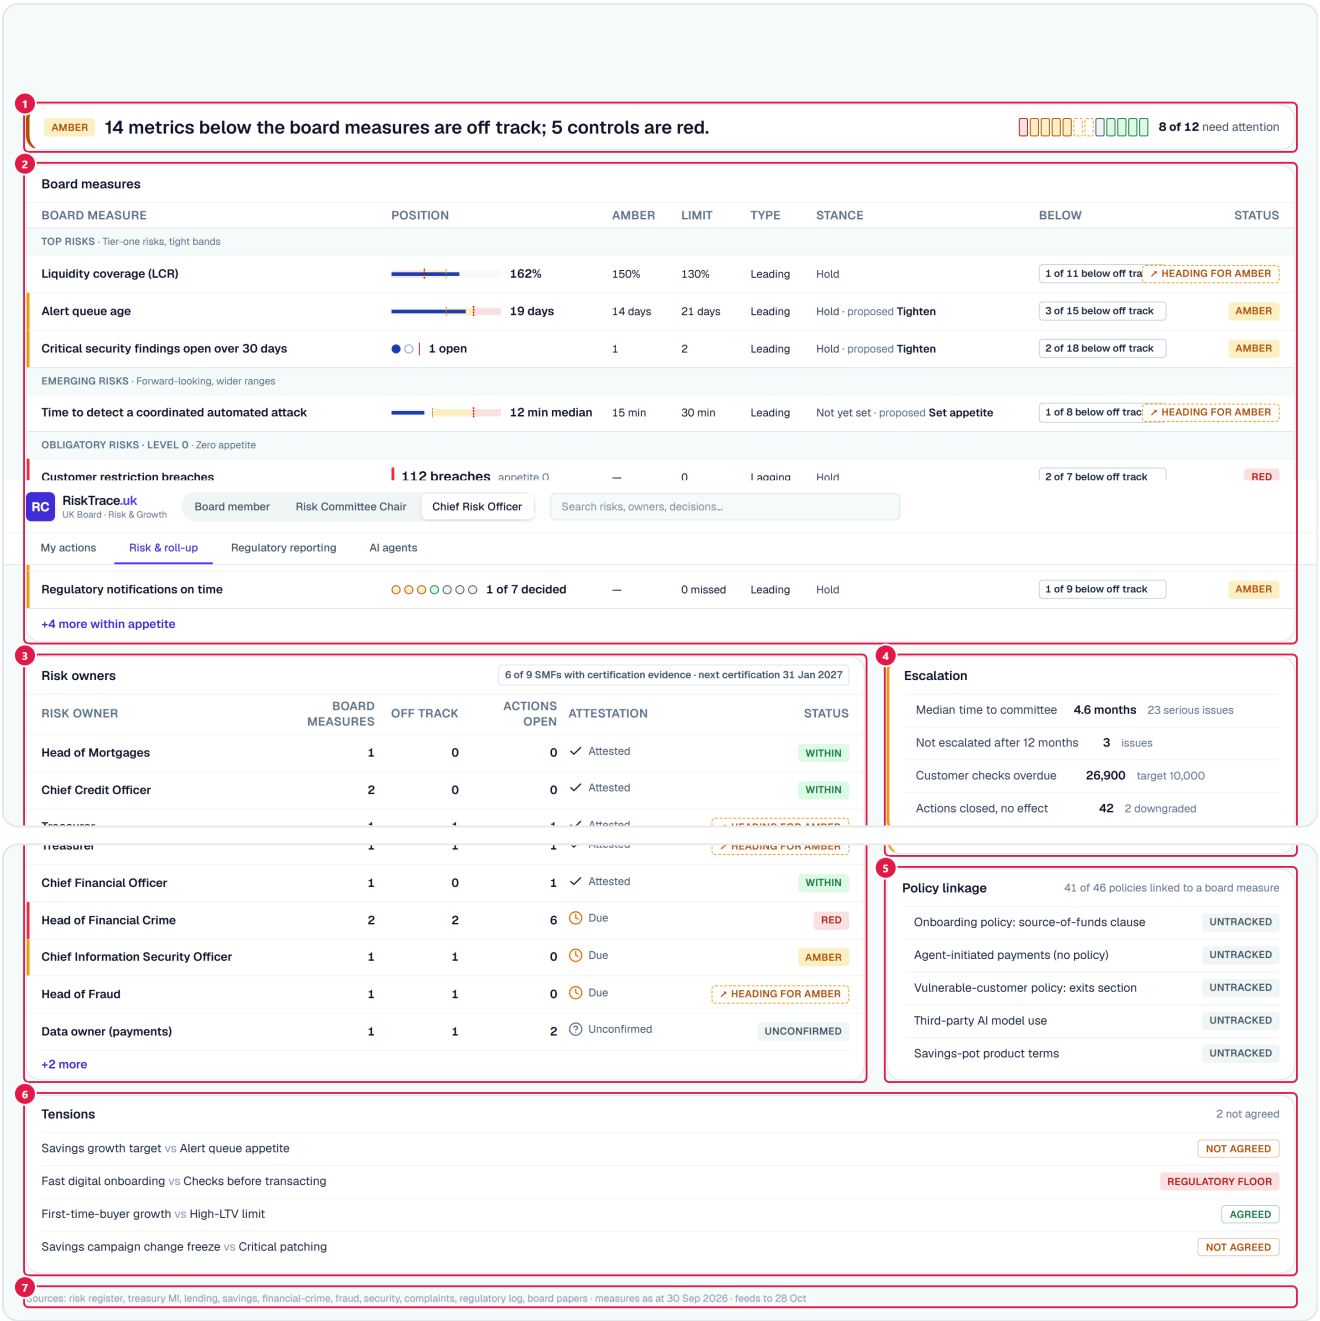

What it shows	12 of 13 items in pack v2 locked, removed item first, three decision papers.
Why it is there	Is the board pack complete before it goes out?
Data source	Board and committee papers · per meeting · 26 Oct 2026
How it is worked out	Count of items in the latest pack version against all pack items.
What to do with it	Propose restoring the vulnerable-customer item; prepare papers due 8 Dec and 15 Dec.

7 Sources line

3 Regulatory reporting

Regulator reporting for each event: routes, the restriction breach and enforcement themes.

1 Headline bar

Described at Same as Board member · Overview · 1

On this tab "Restriction breach: 0 of 3 routes decided; read-across not started."

2 Reportable events

Described at Same as Board member · Regulatory · Level 0 · 3

On this tab Adds Send case on the 4 pending routes; nothing goes to a regulator.

3 Restriction breach

Described at Same as Board member · Regulatory · Level 0 · 4

4 Enforcement themes

Described at Same as Board member · Regulatory · Level 0 · 5

5 Regulatory horizon

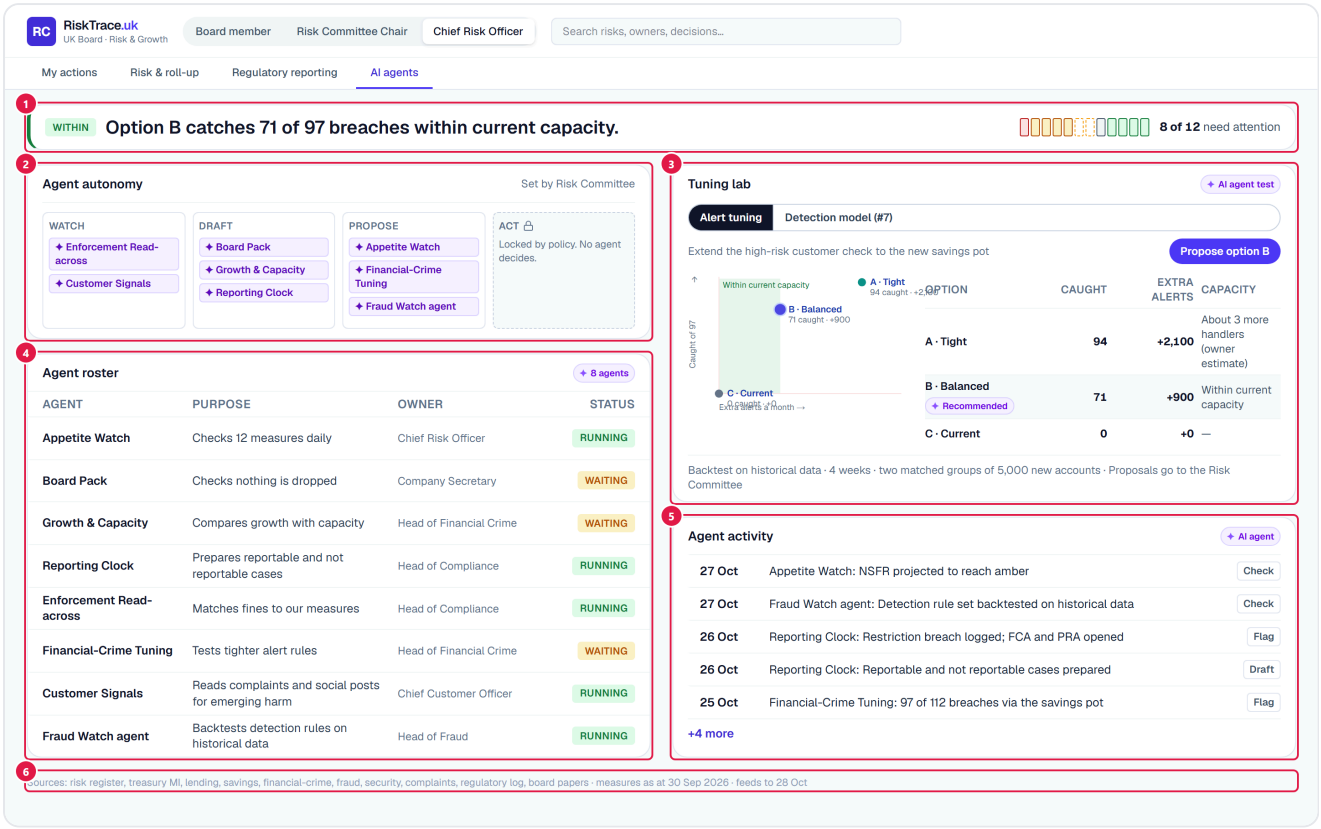

Described at Same as Board member · Regulatory · Level 0 · 8

6 Sources line

Described at Same as Board member · Overview · 8

4 AI agents

Agent autonomy, roster, tuning lab and the activity log.

1 Headline bar

Described at Same as Board member · Overview · 1

On this tab "Option B catches 71 of 97 breaches within current capacity."

2 Agent autonomy

Described at Same as Board member · AI agents · 5

On this tab Read only: levels are set by the Risk Committee.

3 Tuning lab

Described at Same as Board member · AI agents · 3

4 Agent roster

Described at Same as Board member · AI agents · 6

5 Agent activity

What it shows Nine dated agent events tagged Check, Flag, Draft or Approved.

Why it is there What have the agents done lately, and was a person involved?

Data source Agent activity log · continuous log · 28 Oct 2026

How it is worked out Entered from Agent activity log; each line is agent name plus event.

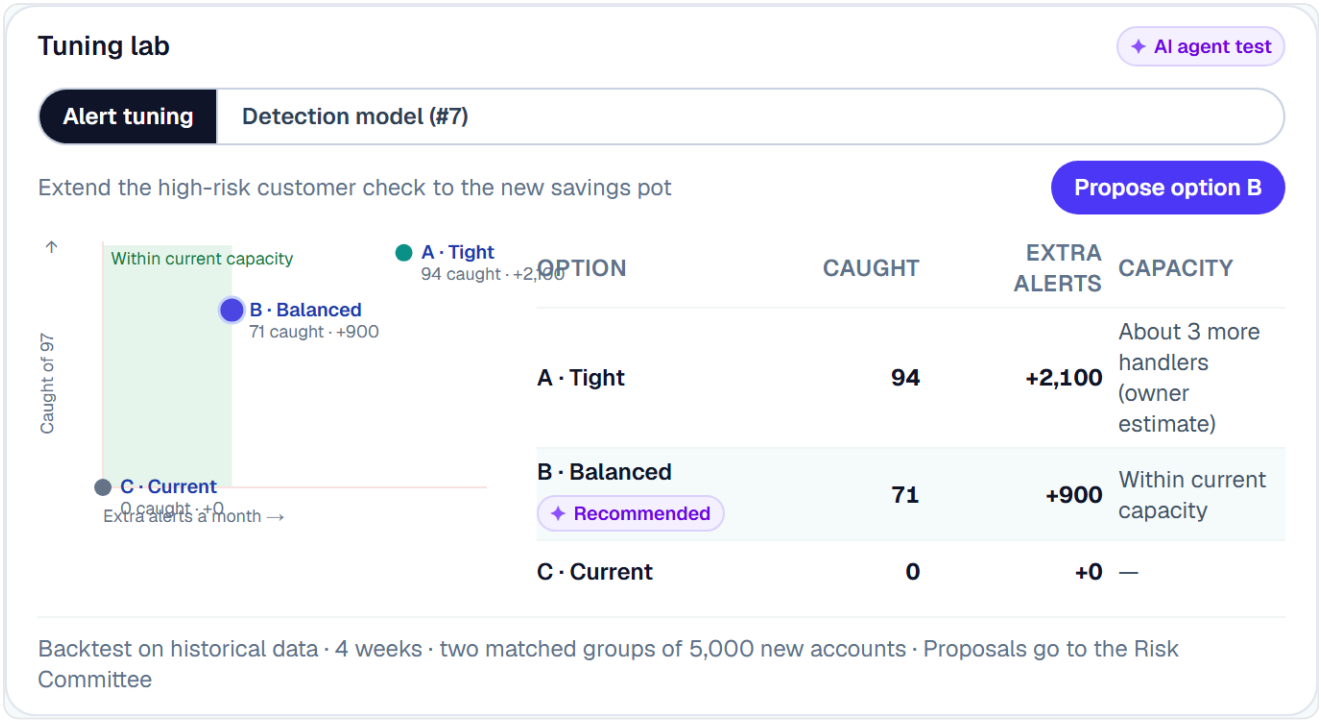

What to do with it Confirm the 23 Oct approval was decided by Head of Compliance.

6 Sources line

Described at Same as Board member · Overview · 8

5 State: Tuning lab: alert tuning

First scenario: extend the high-risk customer check to the savings pot.

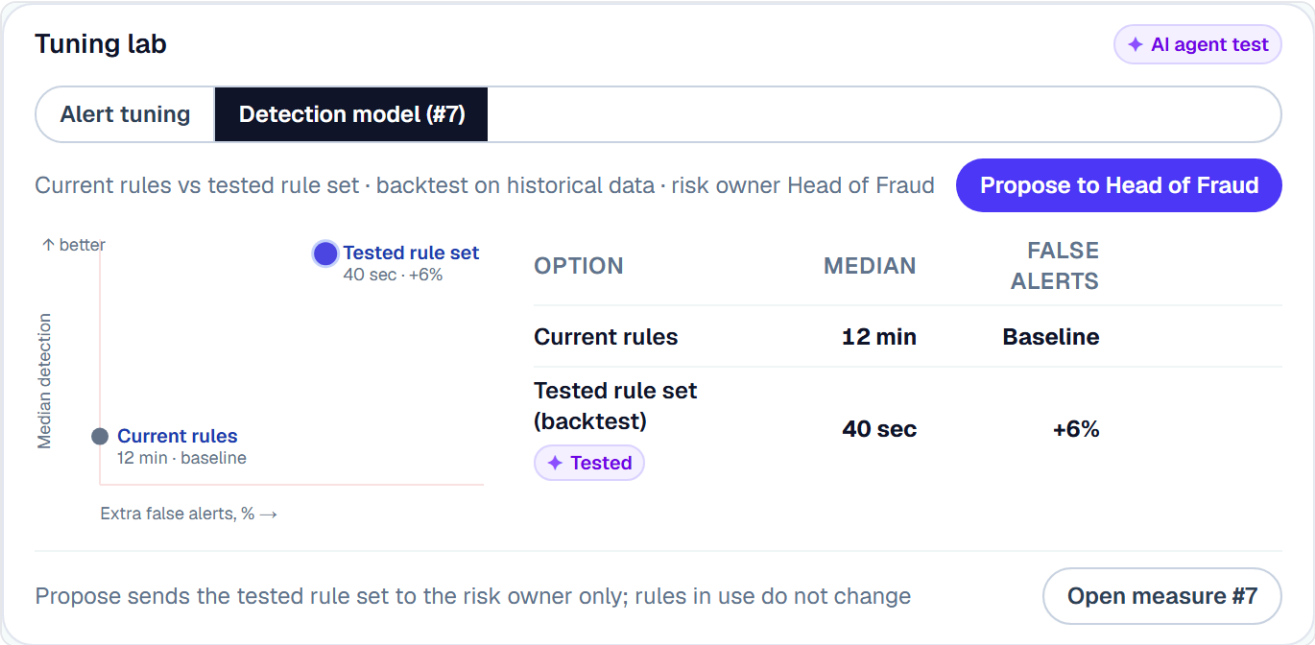

1 Tuning lab: alert tuning

What it shows	Alert tuning: options A, B, C, caught of 97 against extra alerts a month.
Why it is there	Which lever do we pull to close the savings pot gap?
Data source	Agent activity log · continuous log · 28 Oct 2026
How it is worked out	Entered from Agent activity log; shaded zone is options within current capacity.
What to do with it	Propose option B: 71 of 97 caught, +900 alerts, within current capacity.
Label	Backtest on historical data

6 State: Tuning lab: detection model

Second scenario: current detection rules against a tested rule set.

1 Tuning lab: detection model

What it shows	Detection model (#7): current rules 12 min versus tested rule set 40 sec.
Why it is there	Should the tested rule set go to the risk owner?
Data source	Agent activity log · continuous log · 28 Oct 2026; Fraud platform logs · daily · 28 Oct 2026
How it is worked out	Current from Fraud platform logs measure; tested set from Agent activity log backtest.
What to do with it	Propose to Head of Fraud: 40 sec median, +6% false alerts.
Label	Backtest on historical data

7 State: Ask the board agent

Not on screen: the panel was removed with the header row and is not mounted.

1 Ask the board agent

What it shows	Six suggested questions with pre-built answers and cited measures.
Why it is there	Can a board member get a quick cited answer from the pack?
Data source	Source not wired: the panel is not mounted in this build
How it is worked out	Answers prepared in advance from pack data; typed questions matched by keyword.
What to do with it	Not reachable on screen; no file imports or mounts this panel.

Glossary

RAS	Risk appetite statement: the board's limits for each risk it takes.
Level 0	Obligatory risks with zero appetite: regulatory must-haves, never traded off.
Top risks	Tier-one risks the board steers directly, with tight bands.
Emerging risks	Forward-looking risks with wider bands, still being measured.
Obligatory risks	Regulatory duties: the Level 0 tier.
Amber trigger	The early-warning point before the appetite limit.
Appetite limit	The line the board has said it will not cross.
Leading / lagging	Leading measures warn early; lagging measures confirm what happened.
LCR	Liquidity coverage ratio: cash-like assets against 30 days of stressed outflows.
NSFR	Net stable funding ratio: stable funding against longer-term needs.
CET1	Common equity tier 1: the core capital ratio.
High-LTV	Mortgages with a high loan-to-value, here for first-time buyers.
LTI	Loan-to-income: loan size as a multiple of income, e.g. above 4.5×.
EPC	Energy performance certificate: home efficiency bands A to G.
SMF	Senior manager function: a named regulated role with personal accountability.
SAR	Suspicious activity report: a report to the National Crime Agency.
Consumer Duty	The FCA (Financial Conduct Authority) rule on good customer outcomes.
Read-across	Checking whether one event points to the same gap elsewhere.
Attestation	A risk owner's monthly sign-off that their figures and controls are right.
Line of sight	Whether a named owner can see a customer journey end to end.
First / second / third line	Business owns risk; risk and compliance challenge; internal audit assures.
Backtest	Testing a change on historical data before using it live.

READING THE BOARD VIEW IN TWO MINUTES

1. Read the headline: the main problem and the ask.
2. Check the four objectives: on track, at risk or off track.
3. Look at what is outside appetite, worst first.
4. Note what may need telling to the regulator, and who decides.
5. Take the board decisions: tighten, hold or loosen.
6. Check who owns each risk and whether they have signed this month.
